## Document Body

Ms. Santos,  
I have reviewed your email. Thank you for the information.  
I am available all day Thursday. Let us know as soon as you can what time is best for you Thursday.  
I am having problems with my work phone (retrieving messages), so can you call my cell phone (626) 893 4790 or email me with the times you are available.

Your email suggests that you cannot move forward with the meeting or the permit process until you know the original concentration of PCBs in the lubricating oil. The consultant does not have that information (at this time). As I stated in a previous email, they know the types of oil with a corresponding letter (a,b,c,d,e,...)that letter may indicate the amount of PCBs, but I do not know. Until the consultant can get that information,

is there no need for a phone call ? Please let me know. Further, what if they cannot find this information ? what is the next course of action?

Can you send me Max Weintraub's email address ? If he is in your office, it would seem that you can more easily locate his email address.

Thanking you in advance for your time and assistance in this matter.

Christine Bucklin, P.G.
